

# App

## Business management

## Welcome to our application

Our app has been designed to make managing your business easier and more efficient. Discover how you can optimize your processes with just a few clicks.

## Advantages of the Application

Scan pre-generated barcodes into Excel to automatically identify products

Allows you to add stock and register new products after purchases or imports 04

Record who sells, when and where, along with the payment method

When recording a sale, the application automatically reduces the stock in the Dataverse

Identify the employee in each transaction for complete control

User: employee 1 INICIO	
Ventas	
Inventario	
Modificar Mercaderia	
Agregar Producto Nuevo

### Dataverse

As your business grows, Dataverse can seamlessly scale to handle larger volumes of data while maintaining performance and efficiency.

Being cloud-based, Dataverse ensures that your information is available from anywhere, at any time, and with the peace of mind that it is securely backed up.

With Dataverse, you can set up automated workflows, for example for stock updates, low inventory alerts or reminders to place new orders. This streamlines the day-to-day management of the business.

### Linking to Power BI

View sales and stock in real time for informed decisions

Display visual alerts for products that are close to being out of stock

Filter data by date, employee, payment method, brand, SKU, color, or whatever you want.

### **Customer Service**

#### **Continuous Technical Support**

We are committed to providing you with ongoing technical support, always available to resolve any questions or issues that may arise during the implementation or daily use of the application.

#### **Constant Updates and Improvements**

Our service continues after delivery, offering you regular updates and improvements, adapting the application to your needs and ensuring that you always have the best solutions for your business.
